Capability Statement

Introduction

Turntec Manufacturing is a full service manufacturing and conventional machining company. Founded in 1993, Turntec has been providing machined products and services throughout North America for 30 years.

Capabilities

- Conventional machining with lathes
- Precision CNC machining
- CNC plasma cutting
- Engineering design and development
- Honing & bore enlargement
- Welding
- Quality assurance

Past Performance

- The Forge Project, Utah, 2019: provided geothermal research facility with a liner hanger design for deep well.
- FDA, Montana, 2020: built side door system to gather soil samples.
- Hydro Resources, Montana, 2023-present: provided all components for large well.
- Tellus Operating, Mississippi, 2018: provided liner parts needed for CO₂ enhanced oil recovery.
- 30 years providing product and service provider to largest oil and gas companies worldwide: Baker Hughes, Haliburton, Schlumberger.

Differentiators

- Proud employers of veterans with numerous certified employees and strong employee retention.
- Expansive facilities and equipment, including CNC, Lathe, Welding, and the largest machining footprint in the region.
- Unique ability to work with hardened alloys.
- Cater to customers specific and specialized needs.
- Support and encourage partnership and innovation with engineering and machining college programs.
- Onsite logistics assistance, engineering troubleshooting, and local delivery.
